

SECONDOPINIONS.COM® Introduces Innovative Cloud-Based Medical Imaging Exchange Service for Easy Upload, Access and Sharing Anytime/Anywhere

Ft. Lauderdale, FL. (PRWEB) July 31, 2014

FORT LAUDERDALE, FLORIDA – July 30, 2014 – USARAD Holdings Inc. a leading US Joint Commission Accredited teleradiology and telemedicine solutions provider now offers the most innovative and technologically advanced consumer storage and sharing platform for medical imaging via SecondOpinions.com®. The teleradiology leader is providing valued members the use of its Cloud-based medical image exchange platform enhancing the extraordinary services already offered by SecondOpinions.com®.

Wide-spread radiologic image digitization has been growing significantly over the years. It is estimated that since 2000, 600-700 million of radiologic studies are performed in the United States alone each year. At least 1.5 billion across the world use the standardized digital format called DICOM. More than 15 billion imaging examinations have accumulated in digital format over time. Virtually all of these studies are stored in a cumbersome way without ability to quickly access, view or share images.

Now SecondOpinions.com® is making it possible for patients, doctors and medical facilities to access and share medical images anytime, anywhere across the planet. This medical exchange service enables users to quickly and securely acquire, manage, and distribute imaging data.

SecondOpinions.com® is able to perform study uploads, archive images for up to 7 years, share and view free of charge for cases presented for second opinions.

The benefits of this Cloud-based exchange service include real-time sharing, more control for patients to access medical data, improved healthcare by receiving second opinions and expert reviews on demand, reduced costs for imaging facilities, time saved for medical professionals and patients as well as more efficient data exchange between facilities. Best of all - no more CDs or DVDs to burn and exchange! Everything can now be stored on the cloud.

SecondOpinions.com® provides customers with expert opinions from specialists and subspecialists. Customers simply upload digital images (MRI, CT etc.) to a HIPAA regulated, secure, confidential platform and receive a report within hours. In addition, doctors in virtually every medical specialty are on standby to provide written second opinions as well as consultations via phone or video chat. Studies have shown that obtaining a second opinion decreases medical errors, saves lives, and keeps healthcare costs down by preventing unnecessary surgeries and procedures. Second opinions also give patients the peace of mind they need and deserve.
