Commission

The COR Analyzer® System

BENEFITS AND ADVANTAGES

IMMEDIATE Patient Positive/Negative Indications on the Main Screen.

MAIN SCREEN Provides an immediate indication of “healthy” coronary patients and those patients with suspected coronary artery stenosis. The same screen indicates the specific location of any detected lesion. One click provides curved MPR views of the specific vessel and detected lesion/s.

THE COR ANALYZER® SYSTEM Helps to speed your decision making and to reduce observation time.

The Analyzer does not take the place of a workstation. It is a decision support tool that provides an immediate indication as to whether a patient has “healthy” or potentially diseased coronary arteries.

Is Your Patient's Heart **Green** or **Red**?

COR Analyzer helps you distinguish between healthy* and potentially diseased coronary patients. All it takes is two **simple symbols!**

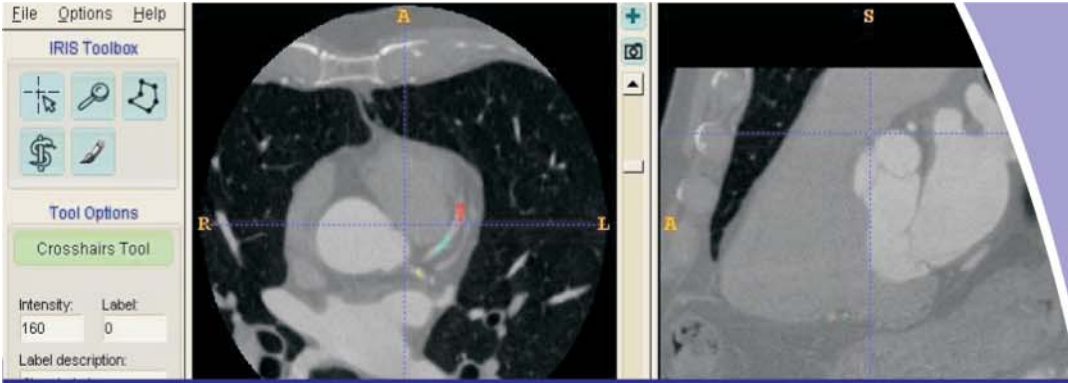

* Healthy Coronary Patients = No Significant (50% or more) Stenosis Detected in cCTA Studies

Your Hospital's Competitive and Strategic Advantages Utilizing Cor Analyzer and Cardiovascular Imaging Institute at USARAD.com

- **Benefit from starting a 24/7 cCTA program in your community**
- **If your facility has a 64 slice CT and it is not working 24/7 then your facility is losing revenue. Now we can provide the expertise that is missing overnight in cardiac interpretation**
- **Differentiate your facility and enhance your hospital's professional reputation**
- **Increase bottom line revenues-911 cardiac cases sent to your hospital**
- **Save lives, put patients minds at ease quickly**
- **Reduce overnight ER stays because of cardiac uncertainty**
- **Marketing and cost containment provided by our partnership for your benefit**

The Cardiovascular Imaging Institute at USARAD.com is Led by Michael Yuz, MD, MBA

Dr. Yuz is a highly trained, certified expert in cCTA interpretation

Cardiovascular Imaging Institute @ USARAD.com

BENEFITS AND ADVANTAGES

- **Exclusive training in rCADIA cCTA**
